PROJECTS

Personal Portfolio Web

<https://portfolio-page-git-main-stefanynogueras-projects.vercel.app/>

- Developed a personal portfolio using Next.js, React, and Tailwind CSS, showcasing web development and design skills.
- Focused on performance optimisation and responsive design, demonstrating proficiency in modern web development practices.

Painting App University Project

<https://stefanynoguera.github.io/draw-app-website/>

- Developed a modular drawing app using p5.js, HTML, CSS, and JavaScript. Features include freehand drawing, shapes, patterns, and more.
- Focused on creating a user-friendly, scalable, and maintainable codebase, with each tool implemented as a separate module.

Game University Project

<https://stefanynoguera.github.io/game-project-website/>

- Developed an interactive game using p5.js and p5.sound, with HTML and CSS for structure. Features character movement, sound effects, and environmental elements.
- Focused on state management and sound integration for an immersive gaming experience.

The Luxury Collection

<https://the-luxury-collection-7a95ba2e8480.herokuapp.com/>

- Developed a scalable web app using Ruby on Rails, PostgreSQL, Webpack, and Hotwire. Integrated Cloudinary for file storage and Sass for styling.
- Initially struggled with responsive design, learning the importance of prioritising it early in development for smoother implementation.
